

Webinar Announcement

Japan-India Partnership towards Net Zero Society: Outcomes, lessons learned and way forward of JITMAP

February 8, 2022, 11.30 am

Dear Industry Leader,

As you are aware, SMEs generate high volumes of CO₂, mainly because they continue to depend on traditional inefficient technologies. Hence the SME sector offers considerable potential for reducing India's GHG emissions through the introduction of new, cleaner low carbon technologies (LCTs).

TERI and Institute for Global Environmental Strategies (IGES), Japan have launched a Japan-India Technology Matchmaking Platform (JITMAP) to promote the engagement and matching of Japanese and Indian stakeholders, public and private, to facilitate mutually beneficial transactions in LCTs, which include energy efficient technologies (EETs), best operating practices (BOP), and renewable energy technologies (RETs).

We are pleased to present a webinar on Japan-India Partnership towards Net Zero Society. The webinar will share information on energy saving projects undertaken under JITMAP and discuss how the platform could be further strengthened to accelerate the implementation of LCTs among Indian SMEs. A draft agenda of the event is enclosed.

You may register for the webinar using the following link:

https://us02web.zoom.us/webinar/register/WN_Pr96cYmRTwW4UY-wPx0y7A

After registering, you will receive a confirmation email containing information about joining the meeting.

Duration: 1 hour 45 minutes

Program date: Tuesday, February 8, 2022

Time: 11.30 am

Please feel free to circulate the webinar announcement among interested stakeholders.

Thank you.

With regards,
JITMAP team
